CASIO ®
TK-3200

The Casio TK-3200 features a combined flat and raised keyboard, dual dot matrix printers and a bright customer display making it ideal for the hospitality or retail environment.

Receipt, journal and validation printing

The TK-3200 features two fast 45mm wide dot matrix printers for receipt, journal and cheque validation printing. To give your business a professional appearance, text can be printed for a customer greeting and product descriptions.

Barcode scanning

The TK-3200 can be used in conjunction with a barcode scanner. This function allows up to 5000 products to be scanned into the cash register, ensuring that products are sold at the correct price and eliminating the need to manually enter prices.

Table control function

A basic table control function is provided for small restaurants, cafes and bars. This allows purchased items to be input against a table number, allowing easy check tracking.

By attaching the TK-3200 to a remote kitchen printer, food orders can automatically be printed in the kitchen, maximising order preparation time.

Display

A bright 8 character and 7 digit display means your staff can easily see the details of the items they are selling to ensure accuracy. A standard pop-up rear display ensures your customers can see the price they are paying, giving them peace of mind.

Help function

The TK-3200 is simple to operate, however there is also a user friendly "HELP" button on the keyboard. Answers to frequently asked questions such as how to programme the time and date can be printed on the receipt printer for easy reference.

Peripherals

For maximum flexibility, the TK-3200 features two serial ports for direct connection to PC, modem for connecting to head office, external remote printer, slip printer for printing guest receipts or validation and scanner for barcode reading.

Reports and useful functions

Daily reports can be printed on the TK-3200. Other useful funtions include clerk interrupt, scheduler function, set menu function, arrangement function and memory allocation.
